582-534 Israel

Dear Sirs,

re : Application No. 32164
Your file 582-534 Israel

In the above matter, the Registrar has now notified us that Claim No. 1 in this application seems to lack novelty in view of the existence of U.S. Patent No. 2992647.

Claim No. 2 indicates a separate invention. This is not allowed under article 8 of the Israeli Law of Patents, which requires that a separate patent be applied for in respect of each invention.

Some alterations are required in accordance with the notes made by the Registrar on your description and drawing which we are enclosing herewith.

Will you please let us have your instructions and return us the documents as soon as possible.

Yours sincerely,

Arnold Spaer
